

## CAPABILITY STATEMENT

[www.stratengroup.com.au](http://www.stratengroup.com.au)

## ABOUT US

Straten Group is a manufacturer and supplier of wire bar chairs and concreting accessories for the post tensioning and construction industries. We offer:

- High quality products. Designed to be robust and efficient, saving you time and money
- High stock levels for minimal lead times and prompt dispatch
- Shipping both Australia-wide and internationally, delivering to warehouses and direct to site.

## OUR WAREHOUSES

Our warehouses are strategically positioned across key regions, allowing us to optimise stock management and ensure fast, reliable dispatch. Our warehouses are located in:

### **Brisbane**

70-74 Harburg Drive, Beenleigh QLD 4207

### **Sydney**

29 Glendenning Road, Glendenning NSW 2761

## OUR COMMITMENT TO YOU

We understand the time and budget constraints in the Post Tension and Construction industries, and are dedicated to making our customer's requirements our priority. We're enabling our customers to stay ahead of their project deadlines with stock on demand, flexible delivery, and simple, cost effective solutions.

## OUR CORE PRODUCTS

### PT Polymer Accessories

Our range of polymer accessories are designed for strength, durability and ease of install. Including but not limited to: grout vents, recess formers, stressing pans, tendon markers, strand caps, square bar dowel units, and more.

### Wire Bar Chairs

Straten Group stocks a wide range of PT Wire Bar Chairs for 70mm and 90mm duct. Suited to both clip-on and tie-on applications, our chairs have plastic coated feet to prevent corrosion.

## WAREHOUSING & MANUFACTURING CAPABILITIES

Straten Group is equipped for in-house manufacturing, packaging, and dispatch, including state of the art robots for precision bending. This means we can continue to meet ongoing demand, and keep your project deadlines our priority.

Straten's large warehouse facility also enables us to stock high levels of inventory for prompt dispatch.

“

The team at Straten Group provide excellent service and product range. We have been dealing with them for over five years, and have not had any cause for concern. There has been clear communication, and shipments have always arrived on time. Highly recommend their services.

”

- PJM Industrial

## CASE STUDY

A NSW customer reached out to Straten Group with one mission in place, to develop a lateral movement joint to suit their own specifications. We worked together on the material, dimensions and design, and developed Straten Group's first Square Bar Dowel Unit.

Now also used in their Victorian branch, our customers know they have a reliable supplier, backed by good stock levels and competitive pricing.

## PROCUREMENT & SUPPLY CHAIN

At Straten, we closely monitor our supply chain so we continue to deliver quality products with minimal lead times. Based on Australia's eastern seaboard, Straten's central location is ideal for shipping Australia wide and direct to port for our international customer base. As we offer delivery both to warehouse and direct to site, our customers have complete control over when and where they want our products delivered. Due to our in house manufacturing capabilities, Straten can also continue to meet demand regardless of external threats within the supply chain.

“

Interspan have been using Straten Group for over 10 years. Their product and knowledge are first class and I couldn't recommend them enough. We are a large construction post tensioning company and our orders are of a large quantity. Straten's time frames to pack and deliver are always on target. Their communication with deliveries and product is fantastic. Company highly recommended.

”

- Interspan Victoria

## CASE STUDY

We work with a range of customers to forecast their upcoming requirements, and develop a stock plan for their future projects. This means the customer is:

- Aware of their inventory levels, reducing wastage
- Prepared in advance for upcoming projects
- Guaranteed stock to prevent project delays
- Guaranteed timely delivery.
